Heavy Hitter

Heavy Hitter is a water based, biodegradable, non-flammable, and non-hazardous cleaner/degreaser. It's designed to remove lubricating oils and grease from surfaces such as floors, machinery, stamping, dyes, plastics, and rubber. Heavy Hitter contains ingredients that emulsify soil from affected areas and an agent that keeps the soil from redepositing on the cleaned surface. It also contains a corrosion inhibitor, keeping the cleaner from attacking the surface while cleaning.

Directions: Wear safety glasses and rubber gloves when using Heavy Hitter. For heavy equipment and machinery, use full strength, 4:1, depending on the soiled area. Spray on and let stand 1-2 minutes then wash off. Use full strength on concrete, 8:1, depending on soiled area. Spray on and agitate with brush or mop and rinse. With a hot pressure washer, use full strength, 20:1. Spray Heavy Hitter on equipment and spray off with pressure washer. Do not allow product to freeze or dry on surface.

Specifications

- Specific gravity; 8.8 PPG
- pH; 12.5
- Freezing point; 30-32°F
- Odor; mild/sweet

Applications

- Industrial equipment
- Concrete floors
- Rubber/plastic
- Industrial machinery

Availability

Heavy Hitter is available in 5 gallon pails, 55 gallon drums, and 330 gallon totes.
